Frameworks: SpringBoot, Django, Flask, NodeJS

Developer Tools: Docker, Git, PostgreSQL, MySQL, SQLite, Arch Linux, AWS, IntelliJ, PyCharm

WORK EXPERIENCE

Software Developer Coop

April 2021 – Present

Drexel University

Philadelphia, PA

- Developed and improved functionality by creating 4 REST API's using the Java Spring Framework
- Translate business requirements and mock ups into working web interfaces
- Create specialized applications and micro services from the ground up in Java
- Developed data models deployed in Microsoft SQL

Undergraduate Research Assistant (Part Time)

July 2021 - Present

Drexel Wireless Systems Lab, Department of Computer Engineering, Drexel University

Philadelphia, PA

- Develop web based IoT management system with Java Spring Framework
- Create API to interface with 10 IoT devices around campus
- Develop software for docker containerized IoT hubs around campus
- Sync data with Things Board IoT System

AWS Dev Ops Coop (Part Time Tech Support Specialist)

September 2019 – March 2020

Wharton School, University of Pennsylvania

Philadelphia, PA

- Leveraged AWS Lambda Instances to save over 50 hours of work/year for updating employee data
- Designed multiple web platforms responsible for tracking IPs and net addresses using Python—Flask frameworks
- Utilized Flask and Postman to develop a REST API responsible for monitoring data
- Employed tools such Terraform, DynamoDB, Amazon S3 Bucket and AWS Cloud9 in day to day operations
- Oversaw Wharton Technical Support Center by providing technical support to 100+ as troubleshooting and VPN services to students and staff

Full Stack Web Developer/ IT

March 2018 – June 2018

KT Exports

Mumbai, India

- Developed a marketing web platform using HTML/CSS and Javascript
- Migrated existing database onto Zoho CRM Software and configure CRM Software

SELECTED PROJECTS AND AWARDS

Campus Sellout | *Python, Flask, React, PostgreSQL, Docker*

June 2020 – Present

- Deployed an E Commerce platform using Flask, Bootstrap and SQLAlchemy
- Applied Nginx on an Ubuntu Server(Linode) to host the completed web platform

Drowsy Dragons | *Third Place at Dragon Hacks Drexel University IEEE Hackathon (Devpost)*

April 2021

- OpenCV and Python Pillow library on a Raspberry Pi using to detect drowsiness in drivers
- Made backed website that calls spotify API to change music to alert the user

Nest | *Best Student Team Prize at Philly Codefest Hackathon (Devpost)*

May 2019

- A web application to help connect homeless people to shelters, soup kitchens and toilets.
- Built using HTML, Javascript, NodeJS, Firebase and Python

RestaurantVibe (Github) | *Location based restaurant picker*

March 2021

- Web application to recommend restaurants to users based on their current mood, location and dietary preferences.
- Node JS and Google Maps API to restaurants to user based on keyword recommendations
